

CALIPER PAINT

DESIGNED FOR AUTOMOTIVE AND INDUSTRIAL

Pacer Caliper Paint is a high-performance, professional-grade enamel coating formulated with ceramic technology for long-lasting protection and vibrant finish. Engineered to withstand extreme temperatures up to 300°C, it provides superior resistance against cracking, chipping, brake dust, road grime, and harsh automotive chemicals. This makes it ideal for enhancing and protecting brake calipers, drums, and rotors. The fast-drying formula ensures efficient application and a durable finish that maintains its appearance under demanding automotive conditions. Suitable for both enthusiasts and trade professionals, Pacer Caliper Paint delivers lasting colour, heat resistance, and reliability on every application.
