

ALUMINIUM FOIL TAPES

VERSATILE ADHESIVE TAPE

GSA Aluminium Foil Tape, is a versatile and reliable adhesive tape widely used in various industrial and commercial applications. The aluminium foil backing provides excellent heat and light reflection properties, making it ideal for applications where thermal insulation and protection are required. The strong adhesive ensures a secure and long-lasting bond, even in demanding environments.

GSA Aluminium Foil Tape is commonly used for sealing, patching, and repairing HVAC ducts, pipes, and insulation materials. It is also used for moisture and vapor barrier applications, as well as for shielding against electromagnetic interference. The versatility, durability, and reliable performance of GSA Aluminium Foil Tape make it a trusted choice for professionals in various industries.

RANGE OF PRODUCTS

- **899048**
Aluminium Foil Tape 48MM x 50MTR
