

EXTREME HEAT PAINT

DESIGNED FOR AUTOMOTIVE AND INDUSTRIAL

Pacer Extreme Heat Paint is a premium ceramic-based coating formulated to withstand extreme operating temperatures of up to 1100°C. Specially designed for automotive and industrial environments, it provides long-lasting protection and a tough, durable finish on exhaust systems, engine components, manifolds, and other high-heat surfaces. Its advanced formula resists grease, rust, salt, and solvents, ensuring a protective barrier that enhances both performance and appearance under harsh conditions. Easy to apply with excellent coverage, Pacer Extreme Heat Paint is the professional choice for durable, heat-resistant finishes.
