

FIRE PROTECTION

PASSIVE FIRE RESISTANT PRODUCTS

Passive fire resistant products are the primary means used in the construction of a building, limiting the spread of flames, heat and smoke thus increasing fire safety. These products contribute to the stability of the building, in case of fire, and provide time for people to evacuate the building safely. Passive fire resistance limits the spread of flames and smoke thus the transfer and flashover of fire between compartments of the building. GSA fire protect products comply to AS1530.4 standards

RANGE OF PRODUCTS

- **1590L**
Fire Rate Facade 600ML Limestone
Barcode : 9340885002784
- **1677CG**
Fire Seal 600ML Concrete Grey
Barcode : 9340885002760
- **1679W**
Fire Seal 600ML White
Barcode : 9340885002791
